Monthly Shipping List NOTES
January 2008 Final 8-25-08 (207 titles, 415 items)
*** INDICATES CHANGES FROM PRELIMINARY JAN 2008 MLS

The State Library Tech Services section is putting more electronic documents into the Digital Archive (DA), even if we received some copies in paper format but usually only a few copies. The new DA PURL will be listed in the shipping list. You will probably want to add it to your catalog record so users have access to the fulltext document online.

Louisiana gumbo [lesson plans] [electronic resource] : a recipe for empowerment; LOUISiana Digital Library. Control no. ocn212231161 http://digitalarchive.oclc.org/request?pid%3Dobjid%3A0000082396. Files are lesson plans for teachers. "Provides educators, students, and independent learners across the nation with a taste of Louisiana's hidden treasures held by the State Library of Louisiana, Louisiana State Museum, and The Historic New Orleans Collection. At the heart of the Louisiana Gumbo lessons is the belief that students achieve success when they are engaged in authentic, active-learning classroom activities. Each Louisiana Gumbo lesson is correlated to the Louisiana Comprehensive Curriculum and utilizes inquiry and collaboration as springboards for successful teacher-student interaction with relevant primary materials."

FYI. Databases do not qualify as Louisiana public documents so libraries will need to get this themselves directly from the agency.

LOUISIANA SPEAKS RELEASES GIS DATABASE TO PUBLIC
The Louisiana Recovery Authority (LRA) and the non-profit Center for Planning Excellence (CPEX) are distributing an extensive database of spatial information on South Louisiana . The data was collected as part of the Louisiana Speaks regional planning process and is available to planning organizations and members of the public with GIS capabilities.

Nationally renowned consultants partnered with local experts to develop the database, which was compiled from existing data clearinghouses such as the Louisiana State University (LSU) Atlas and the LSU Hurricane Katrina and Rita Clearinghouse Cooperative; state agencies including the Department of Natural Resources (DNR) and the Department of Transportation and Development (DOTD); metropolitan planning organizations; and parish and municipal planning organizations.

"Comprehensive data is a cornerstone to sound planning," said Donna Fraiche, chair of the LRA's Long Term Community Planning Task Force. "Providing this information furthers a Louisiana Speaks goal of increasing the state's planning capacity and builds upon two years of planning initiated in the aftermath of Hurricanes Katrina and Rita."

GIS (Geographic Information System) technology is a tool that allows users to analyze and edit data, as well as create maps for specific uses. The Louisiana Speaks GIS data is organized within the following categories:
- Post-Katrina and Rita Recovery-Related Data

- Hazard-Area Data
- Land-Use and Demographic Data
- Landscape Data
- Infrastructure Data
- Future Community Growth and Transportation Options
- Louisiana Speaks Regional Plan

"For example," says Camille Manning-Broome, Principal Planner for CPEX, "GIS technology might allow emergency planners to easily calculate emergency response times in the event of a natural disaster, or it may assist communities that want to plan the way their land is used and developed."

Certain software, such as ArcGIS or ArcView, is required to run GIS data. Eventually Louisiana Speaks wants to provide resources so that GIS technology can be accessed by the general public, such as companies that want to site a new business that takes advantage of an underserved market, or by home builders who want to place structures on high ground. Louisiana Speaks and its partners are exploring this next phase of this GIS project.

The *Louisiana Speaks Strategic Implementation Plan, Section Four: Technology Transfer and Geographic Information Systems*, provides more information on the contents of the Louisiana Speaks Regional Plan Geographic Information System database, potential uses of the database, and the resources required to use it. The paper is available on **www.louisianaspeaks.org**, or by **clicking here**.

To obtain a copy of the GIS data, contact the Center for Planning Excellence by email at **laspeaks@c-pex.org**, or by phone at 225.267.6300. In order to use this data, organizations and individuals must agree that they will never sell it or charge other groups for its use. More information on the GIS database and Louisiana Speaks can be found at **www.louisianaspeaks.org**.

Louisiana Speaks is the long-term planning initiative of the Louisiana Recovery Authority. Louisiana Speaks is supported with private funds provided by the LRA Support Foundation. For more information about Louisiana Speaks, visit **www.louisianaspeaks.org**.

Hurricanes Katrina and Rita devastated South Louisiana, claiming 1,464 lives, destroying more than 200,000 homes and 18,000 businesses. The Louisiana Recovery Authority (LRA) is the planning and coordinating body that was created in the aftermath of these storms by Governor Kathleen Babineaux Blanco to lead one of the most extensive rebuilding efforts in the world. The LRA is a 33-member body which is coordinating across jurisdictions, supporting community recovery and resurgence, ensuring integrity and effectiveness, and planning for the recovery and rebuilding of Louisiana. For more information, visit **www.lra.louisiana.gov**.

The non-profit Center for Planning Excellence (CPEX) was created to serve as a resource for South Louisiana residents, community organizations, developers and elected officials. CPEX provides information on best practices for planning and urban design, and also provides support and management for the Louisiana Speaks initiative. For more information about CPEX, visit **www.planningexcellence.org**.

MSL date	Correct LaDoc	Title	Incorrect LaDoc	Comments
Jan 2008 prelim	PW 1.1/3: 2003 (2004 Mar 10) - 2006 (2007 Mar 10) 4 nos.	Annual report: phase II MS4 general permit: LAR040000 (Al 94338); Storm Water Management Program (SWMP); Dept of Transportation & Development		Moved to a later MSList.*** Electronic-only. Digital Archive.
