

Item 21 E-Rate WAN verbiage, 2/3/05 per Harry Cook

For use in preparing the 471 Item 21 Attachment -Bundle Description for Erate WAN:

You must identify bundle type and quantity:

Example:

- ▶ (3) 56K Frame Relay connections with a Cisco 1761 or equivalent router = \$x.xx
- ▶ (2) 3mb Frame Relay connections with a Cisco 3725 or equivalent router, = \$x.xx
- ▶ (1) 56K Private Line connection with a Cisco 1761 or equivalent router = \$x.xx.

Footnotes:

Item 21 footnote for Erate WAN Bundle:

This end-to-end solution contains both transport and edge device designed to meet the requirements defined for the State of Tennessee decision as outlined at this URL:

<http://www.sl.universalservice.org/reference/OnPremP1.asp>

- 1) This on-premise equipment is provided by BellSouth, who also provides the eligible telecommunications of which it is a part. Responsibility for maintaining the equipment rests with BellSouth; not the library. Ownership of the equipment will not transfer to the library in the future, and the contract does not include an option to purchase the equipment by the library. Upfront capital charges are less than 67% of total charges in the funding year. The equipment will not be used by the library for any purpose other than receipt of the eligible telecommunications service of which it is a part. The LAN of the library is functional without dependence on the equipment. There is no contractual, technical, or other limitation that would prevent BellSouth from using its network equipment in part for other customers.
- 2) The equipment and services used in this bundle do not allow for remote access, except by BellSouth, who uses it for out-of-bandwidth trouble isolation, problem identification, and problem resolution.

Item 21 footnote for Packaged DIA Bundle:

- 3) This on-premise equipment is provided by BellSouth, who also provides the eligible Internet access of which it is a part. Responsibility for maintaining the equipment rests with BellSouth; not the library. Ownership of the equipment will not transfer to the library in the future, and the contract does not include an option to purchase the equipment by the library. Upfront capital charges are less than 67% of total charges in the funding year. The equipment will not be used by the library for any purpose other than receipt of the eligible Internet access service of which it is a part. The LAN of the library is functional without dependence on the

equipment. There is no contractual, technical, or other limitation that would prevent BellSouth from using its network equipment in part for other customers.

- 4) The equipment and services in this bundle do not allow for remote access, except for maintenance purposes by BellSouth.
